

MADE FOR THE CITY,
FOCUSED ON THE FUTURE

URBAN

by Lecapitaine

URBAN

by Lecapitaine

COMBINING LECAPITAINE'S EXPERTISE AND EXCELLENCE

Lecapitaine has created Urban - our new refrigerated bodywork for Light Commercial Vehicles (LCV) - in response to the challenges of the city and the future: limiting emissions, improving your comfort and safety, and offering optimal transport conditions for your temperature-controlled goods.

INNOVATING SUSTAINABLY

Developed by our R&D teams, Urban features exclusive innovations and patents.

100% LED

⁽¹⁾ Worldwide Harmonized Light Vehicles Test Procedure

URBAN

by Lecapitaine

ENVIRONMENTALLY FRIENDLY

- **Up to 12% energy savings** ⁽²⁾ thanks to vehicle optimisation:
 - Weight loss of **300 kg**
 - Better insulation with a **K coefficient of 0.31 W / m² x °C**
 - **Improved aerodynamics** proven by digital simulations
- **Recycled materials used** to produce sandwich panels (239 recycled 1.5L plastic bottles per URBAN bodywork)
- **A vehicle fitted with URBAN refrigerated bodywork complies with the WLTP procedure** (reduced fuel consumption, CO₂ emissions and pollutants)

⁽²⁾ compared to traditional bodywork and based on a WLTP testing procedure

100% PERFORMANCE

- **Payload** of up to **1,200 kg** depending on vehicle configuration
- Better **TCO** (Total Cost of Ownership) compared to traditional bodywork

UNDENIABLY URBAN

- **Unique design**
- **HD reversing camera** built into the rear frame
- **Secure working area thanks to automated 100% LED lighting** when opening the doors
- **Built-in anti-intrusion central locking**

WATCH THE VIDEO ABOUT URBAN

Located in Saint-Lô (Manche), our company specialises in manufacturing refrigerated bodywork. We design both standard and tailored products, for small and large units. Lecapitaine is now one of the leading European manufacturers of refrigerated bodywork.
